(54) Title: METHOD FOR COMPRESSING AND DECOMPRESSING VIDEO IMAGE DATA

(54) Bezeichnung: VERFAHREN ZUM KOMPRIMIEREN UND DEKOMPRIMIEREN VON VIDEOBILDDATEN

(57) Abstract: A method for compressing and decompressing video image data, wherein the contours of image structures are determined in a basic analysis of the video data contained in a video image by means of sudden modifications of brightness and/or tristimulus value in adjacent pixels; the contours thus found are respectively described in segments by means of a parameterized mathematical function and are defined as objects; a color dominance and a color characteristic is determined for the individual objects, in addition to the position and extension of the individual objects and a structural function, such that differential modifications in brightness, size, position and orientation of said objects are determined in sequential analyses of video images, taking into account common contours of contiguous objects. The objects thus defined are placed in a structured base frame or sequential frame and are prepared. Contour analysis and structural analysis is carried out by means of neuronal networks.

(57) Zusammenfassung: Verfahren zum Komprimieren und Dekomprimieren von Videobilddaten, wobei in einer Grundanalyse der Videodaten eines Videobildes Konturen von Bildstrukturen anhand von sprunghaften Änderungen von Helligkeit und/oder Farbwert bei einander benachbarten Pixeln ermittelt werden, die so gefundenen Konturen, jeweils abschnittsweise durch eine parametrisierte mathematische Funktion beschrieben und als Objekte definiert werden, für die einzelnen Objekte eine Farbdominanz und ein Farbverlauf sowie die Lage und eine Erstreckung der einzelnen Objekte und eine Strukturfunktion ermittelt wird, und dass bei Folgeanalysen von Videobildern jeweils

# INTERNATIONAL SEARCH REPORT

International Application No.

PCT/EP 03/07451

**A. CLASSIFICATION OF SUBJECT MATTER**  
 IPC 7 G06T9/00 G06T9/20

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G06T H04N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, INSPEC, IBM-TDB

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☒ Further documents are listed in the continuation of box C.

☒ Patent-family members are listed in annex.

**\* Special categories of cited documents:**

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*S\* document member of the same patent family

Date of the actual completion of the international search

17 October 2003

Date of mailing of the international search report

28/10/2003
